We advocate that the only viable approach to effectively protect your organization's data is to have multiple layers of protection in place.

THIS IS ESET

Proactive defense. Minimize risks with prevention.

Stay one step ahead of known and emerging cyber threats with our prevention-first approach, powered by AI and human expertise. Experience best-in-class protection thanks to our in-house global threat intelligence, refined for over 30 years, fueling an extensive R&D network led by industry-acclaimed researchers.

ESET protects your business so you can unlock the full potential of technology.

Why choose ESET?

ESET solutions are designed to ensure the highest detection rates with minimum false positives and impact on your environment. This powerful balance supports your business continuity and ensures optimal use of your IT security staff to save your costs. We have a consistent track record of achieving excellent test results and surpassing the limitations of traditional signature-based antivirus software.

COMMITTED TO THE HIGHEST INDUSTRY STANDARDS

SECURITY CERTIFIED

ISO security certified

ESET is compliant with ISO/IEC 27001 an internationally recognized security standard in implementing and managing information security.

ESET solutions including ESET PROTECT

Platform align with ISO 9001's principles by demonstrating ESET's commitment to consistently providing products and services that meet customer and regulatory requirements.

OPSWAT certification

ESET boasts Platinum OPSWAT Access Control Certification for Endpoint Security Applications.

Our protection is designed to solve the most pressing cybersecurity problems: ransomware, phishing, identity-related attacks, insider threats, zero-day exploits and targeted attacks. We address regulatory compliance requirements and common business challenges such as limited IT security personnel or lack of necessary expertise within IT teams.

ANALYST RECOGNITION

ESET is recognized as a Market Leader and an Overall Leader in MDR according to the KuppingerCole Leadership Compass 2023.

The rigorous MITRE ATT&CK Evaluation demonstrated the undeniable qualities of ESET Detection and Response technology and validated the strong vision for ESET Inspect's future.

ESET has been recognized as a 'Top Player' for the fourth year in a row by Radicati in its 2024 Advanced Persistent Threat Market Quadrant.

ESET has been recognized as a Leader in endpoint security in the IDC MarketScape: Worldwide Modern Endpoint Security for Small Businesses 2024 Vendor Assessment

Empowering your security ecosystem

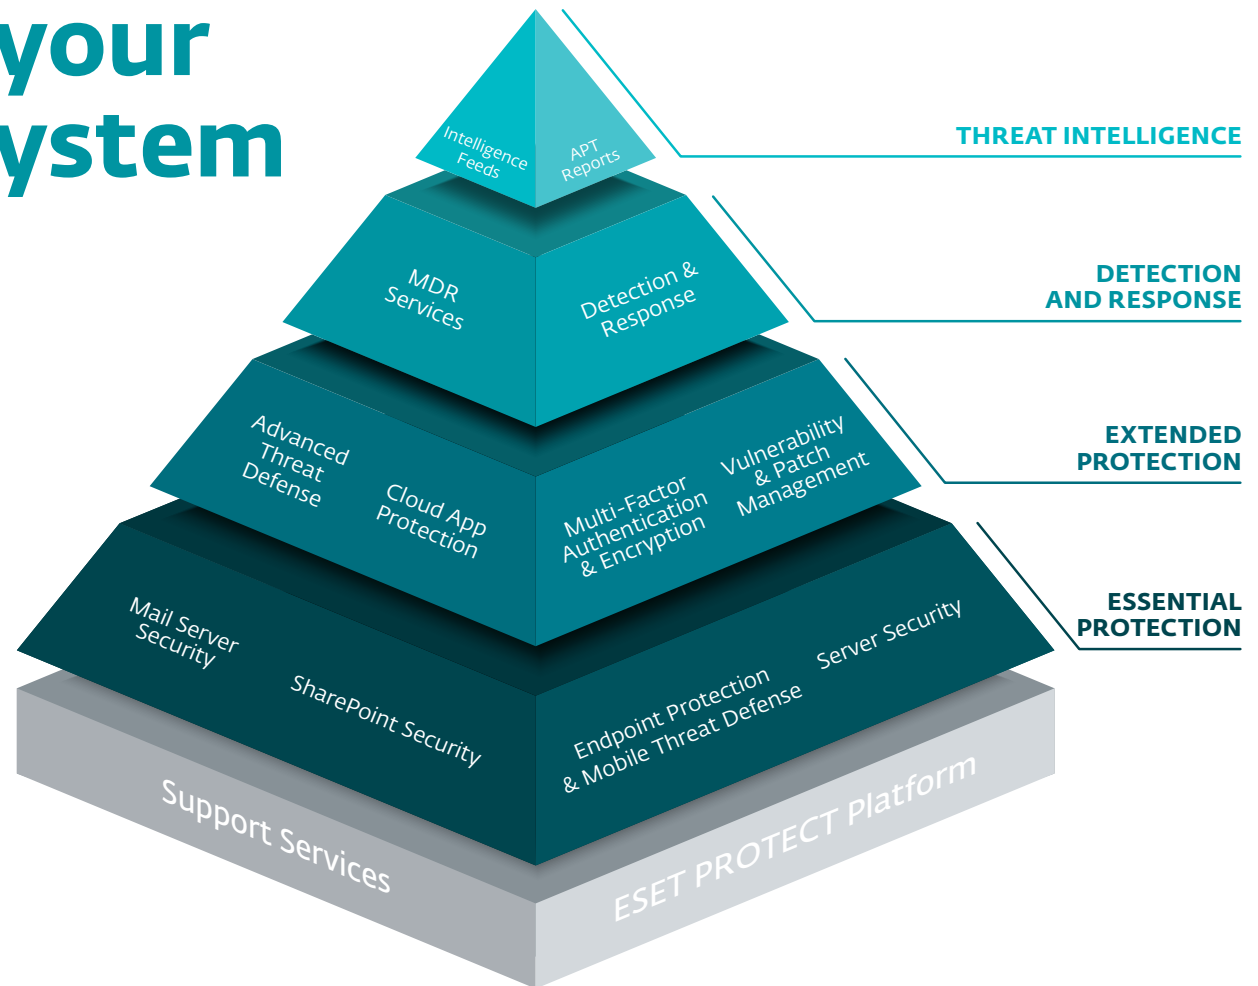

ESET provides a proactive approach to digital security that empowers your organization to thrive.

With layer upon layer of protection, each deploying proprietary technology that is designed to work in concert, ESET will improve your organization's cyber resilience and keep your network safe from any existing or never-before-seen threats.

"A complex IT security solution must work properly and yet be easy to use. ESET masters this balance in an exemplary manner."

Stefan Pistorius, EDP and Administration Manager, Kohlpharma

ESET PROTECT ENTRY

Out-of-the-box protection for all types of endpoints

Protect your business computers, laptops and smartphones. Cutting-edge AI and easy-to-use cloud or on-prem management. Cross-platform solution with server security included.

"We found that ESET matched all our needs. The solution was easy to use, competitively priced and from the kind of industry market-leader we were looking for."

Steven Thompson, IT Support Manager, Totemic

INCLUDED MODULES

Console

Cloud-based or on-prem, unified security management platform interface for ESET business security modules across all operating systems. It enables one-click security deployment and the cloud console gives you network visibility without the need to buy or maintain additional hardware, reducing total cost of ownership.

Server Security

Lightweight multilayered server protection for all general servers and network file storage, to maintain stable and conflict-free operation and ensure business continuity.

Modern Endpoint Protection

Multilayered protection that combines strong malware and exploit prevention by leveraging ESET's multilayered approach, incorporating artificial intelligence, advanced behavioral analytics, big data and human expertise.

- Protect against malware
- Block targeted attacks
- Prevent data breaches
- Stop fileless attacks
- Detect advanced persistent threats
- Utilize Mobile Device Management

ESET PROTECT ADVANCED

Endpoint and data protection against ransomware

Best-in-class endpoint protection against ransomware & zero-day threats. Cross-platform solution with easy-to-use cloud or on-prem management, server security, advanced threat defense and full disk encryption.

“ESET product performance is robust and efficient. Customer service and product support are superior.”

Arun DeSouza, CISO & CPO, Nexteer Automotive Corporation

INCLUDED MODULES

Console

Server Security

Modern Endpoint Protection

Mobile Threat Defense

Robust security for all Android and iOS mobile devices within the organization. Equip your mobile fleet with Antimalware, Anti-Theft and MDM capabilities.

- Safeguard against mobile threats
- Prevent lateral movement
- Protect company data on hand-held devices
- Block unwanted apps
- MDM for iOS and iPadOS included

Advanced Threat Defense

Provides proactive cloud-based threat defense against targeted attacks and new, never-before-seen threat types, especially ransomware, with autonomous remediation capabilities.

- Advanced unpacking & scanning
- Cutting-edge machine learning
- Cloud-based sandboxing
- In-depth behavioral analysis
- Automatic or manual file submission
- Unparalleled speed of analysis

Full Disk Encryption

Allows companies one-click deployment and data encryption on connected Windows and Mac endpoints. It significantly increases your organization's data security and helps you comply with data protection regulations.

- Manage encryption on Windows and macOS machines
- Encrypt system disks, partitions or entire drives
- Deploy, activate and encrypt devices in a single action

ESET PROTECT COMPLETE

Multi-vector protection reducing attack surface

Complete protection for endpoints, cloud applications and email, the #1 threat vector. Cross-platform solution with cloud management, server security, advanced threat defense, encryption and vulnerability patching.

"It's nice to know that our endpoints are now secure, and we can go hard and early on potential threats."

Bob Kambora, IT Manager

INCLUDED MODULES

Console

Server Security

Modern Endpoint Protection

Mobile Threat Defense

Advanced Threat Defense

Full Disk Encryption

Cloud Application Protection

Provides advanced protection for cloud email, collaboration and storage against malware, spam or phishing attacks with ultimate zero-day threat defense and an easy-to-use console.

- An additional layer of protection for Microsoft 365 and Google Workspace apps (Exchange Online, OneDrive, Teams, SharePoint Online, Gmail and Google Drive)
- Automatic protection of new users
- Immediate notification when malware is detected

Mail Server Security

Additional layer of defense to prevent spam and malware from ever reaching users' mailboxes.

- Robust quarantine management
- Multilayered technology filtering spam and malware
- Anti-phishing protection

Vulnerability & Patch Management

Actively tracks vulnerabilities in operating systems and common applications and enables automated patching across all endpoints.

- Severity-based prioritization of vulnerabilities
- Wide range of filtering options
- Automatic and manual patching options

ESET PROTECT ENTERPRISE

Endpoint detection and response solution for superior visibility and advanced threat hunting

Enterprise-grade security and risk management that allow quick analysis and remediation of any security issue in the network. Includes advanced threat defense technology that prevents new, never-before-seen threat types and full disk encryption for enhanced data protection.

"We had a number of specific concerns – ESET really came through with a combination of solutions to address them all."

Leandro Lustosa Santos, Head of Infrastructure and Security, Grupo Servopa

INCLUDED MODULES

Console

Server Security

Modern Endpoint Protection

Mobile Threat Defense

Advanced Threat Defense

Full Disk Encryption

Extended Detection & Response

The XDR-enabling module of the ESET PROTECT Platform, delivering breach prevention, enhanced visibility and remediation.

- Detailed network visibility
- Anomalous behavior detection
- Root-cause analysis
- Multiplatform coverage (Win, macOS, Linux)
- Advanced threat hunting

ESET PROTECT ELITE

All-in-one protection with XDR to prevent breaches

Comprehensive prevention, detection & response that integrates enterprise-grade XDR with complete endpoint, email and data protection, enhancing visibility and threat hunting while reducing cyber risks.

“Thanks to the data from ESET Inspect, we know almost immediately about the security incident, and we can react to it promptly.”

Aleš Staněk, Head of the Cyber Operations Center department

Extended Detection & Response

The XDR-enabling module of the ESET PROTECT Platform, delivering breach prevention, enhanced visibility and remediation.

- Detailed network visibility
- Anomalous behavior detection
- Root-cause analysis
- Multiplatform coverage (Win, macOS, Linux)
- Advanced threat hunting

Multi-Factor Authentication

Easy-to-use and effective mobile-based MFA solution that protects organizations from weak passwords and unauthorized access.

- One-tap authentication
- Support for all types of cloud services
- VPN, RDP and Outlook authentication
- Cloud-based or on-prem deployment options

ESET PROTECT MDR

All-in-one protection with 24/7 MDR service

Superior AI-native protection with continuous threat hunting and monitoring. Access world-leading ESET expertise and threat intelligence via managed detection & response, delivered as a 24/7 service.

“Since deploying ESET across our client base, we have not had a single outbreak. It is refreshing talking to tier 1 support that can actually take care of any issues.”

Ed Bensinger, CEO, Bensinger Consulting

MDR Service

24/7 managed detection & response service that is designed to immediately investigate, disrupt malicious activities and stop adversaries in their tracks. It ensures the organization's digital assets are protected from evolving cyber risks without the need for additional staff.

- Rapid 20-minute threat detection & response time
- Continuous threat monitoring
- Proactive threat hunting
- Weekly or monthly reporting

Premium Support

Guaranteed, prioritized and fast-track technical support, including a quick and detailed analysis of any issues, followed by precise troubleshooting assistance at any hour of the day or night.

- Immediate response
- 365/24/7 support availability
- Certified specialists

ESET PROTECT MDR Ultimate

All-in-one protection with premium 24/7 MDR service

Maximum protection, superior cyber risk management and granular visibility into your IT environment. Stay one step ahead of all known and emerging threats. Access world-leading ESET expertise via our included Managed Detection and Response (MDR) and Premium Support services.

EXCLUSIVELY INCLUDED

ESET AI Advisor

ESET's proprietary generative AI cybersecurity assistant helps with interactive risk identification, analysis, and response.

- ✓ Faster decision-making for critical incidents
- ✓ Automation of repetitive tasks
- ✓ C-Level reporting

"Lightening the operational load has a positive ripple effect, enabling our employees to approach their work with a proactive mindset. It opens up opportunities for innovation and experimentation."

Taro Tanaka, General Manager, IT Architect Division, Canon Marketing Japan Inc.

MDR Ultimate Service

The service combines the skills of ESET's world-class IT security research teams and incident responders, and the cutting-edge technology of ESET's IT security products. Its responsive, tailored support reduces the risk of any interruption in operational continuity.

- Guaranteed response times
- XDR deployment and optimization
- Suspicious behavior investigation
- Digital forensics
- Proactive threat hunting and threat monitoring

Premium Support Ultimate

Provides expert help to set up your ESET IT security products from the moment of installation. The service significantly reduces the number of potential issues down the line, and is available 24/7/365 to address your IT security setup and deployment needs.

- Immediate response, guaranteed by SLA
- HealthCheck service
- Deployment & Upgrade

Complementary add-ons or extras

ESET Cloud Office Security

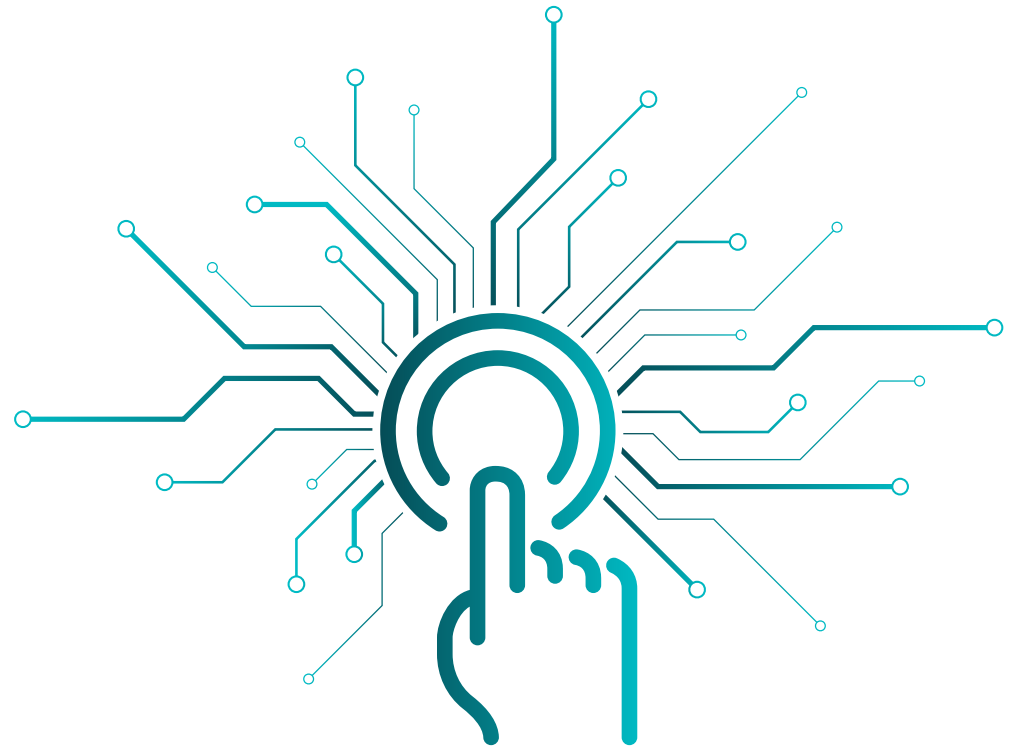

Provides advanced preventive protection for Microsoft 365 and Google Workspace applications against malware, spam and phishing attacks via an easy-to-use cloud management console.

- Antimalware
- Antiphishing
- Antispam
- Antispoofing and Homoglyph protection
- Advanced Threat Defense
- Cloud-based console
- Exchange Online, OneDrive, Teams, SharePoint Online, Gmail and Google Drive protection
- Automatic protection of user
- Customizable reports

ESET Secure Authentication

Easy-to-use and effective mobile-based multi-factor authentication (MFA) solution that protects organizations from weak passwords and unauthorized access.

- Supports mobile applications, push notifications, hardware tokens, FIDO2 security keys, custom methods
- Push authentication that works with iOS and Android smartphones
- No dedicated hardware required
- Full API and SDK included
- Secure VPNs, remote login, web apps and more
- Cloud-based or on-prem deployment options

ESET Security for Microsoft SharePoint Server

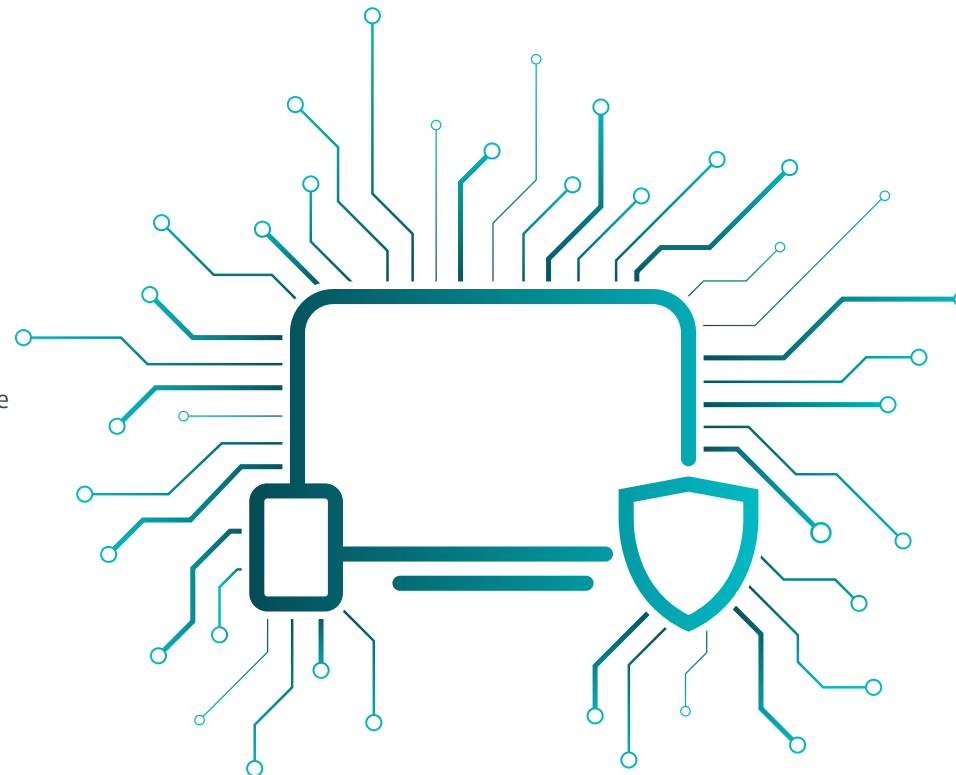

Advanced protection for SharePoint servers against malicious uploads and unwanted files. Guarantees a stable, conflict-free server environment.

- Antivirus
- Antispyware
- Network Attack Protection
- Botnet Protection
- On-Demand Scanning
- Integration with ESET PROTECT Platform interface

ESET Endpoint Encryption

Provides uniquely simple and powerful data encryption and helps greatly increase your organization's data security and compliance with GDPR.

- Patented technology
- Full disk encryption (FDE), file folder encryption, USB encryption, email encryption
- No server required
- Centralized management

ESET SERVICES

AUGMENT YOUR SECURITY WITH THE POWER OF ESET EXPERTISE.

ESET's comprehensive range of services is designed to help you unlock the full potential of your ESET products, ensure protection against any emerging security issues, and prevent any problematic code from spreading within your network.

Threat Intelligence

Extend your security intelligence from local networks to global cyberspace and access the expertise of the ESET threat intelligence team. Get in-depth, up-to-date global knowledge about specific threats and attack sources.

Managed Detection and Response

By combining the skills of our world-class IT security research teams and the cutting-edge technology of ESET products, MDR services bring threat management directly to your doorstep. Achieve industry-leading protection without the need for in-house security specialists.

Premium Support

Access ESET's round-the-clock assistance—even on weekends and holidays to minimize future issues. Benefit from our HealthCheck and Deployment & Upgrade services for optimal system performance and seamless installation & updates.

Industry-leading technology from ESET

AI-native, multilayered approach to digital security

Our proprietary technology, ESET LiveSense, features several layers of protection. It works alongside ESET LiveGrid, our cloud-powered threat hunting technology, which collects and analyzes a vast array of suspicious samples. Combined with AI and our human expertise, ESET's security solutions offer real-time protection against ever-evolving cyber threats.

ESET LiveGrid®

Whenever a zero-day threat such as ransomware is seen, the file is sent to our cloud-based malware protection system, ESET LiveGrid®, where the threat is detonated and behavior is monitored. Results from this system are provided to all endpoints globally within minutes, without requiring any updates.

Artificial Intelligence

Uses the combined power of neural networks and handpicked algorithms to correctly label incoming samples as clean, potentially unwanted or malicious. To offer the best detection rates and lowest possible number of false positives, ESET Augur, our machine-learning engine, is fine tuned to cooperate with other protective technologies such as DNA, sandbox and memory analysis, to extract behavioral features.

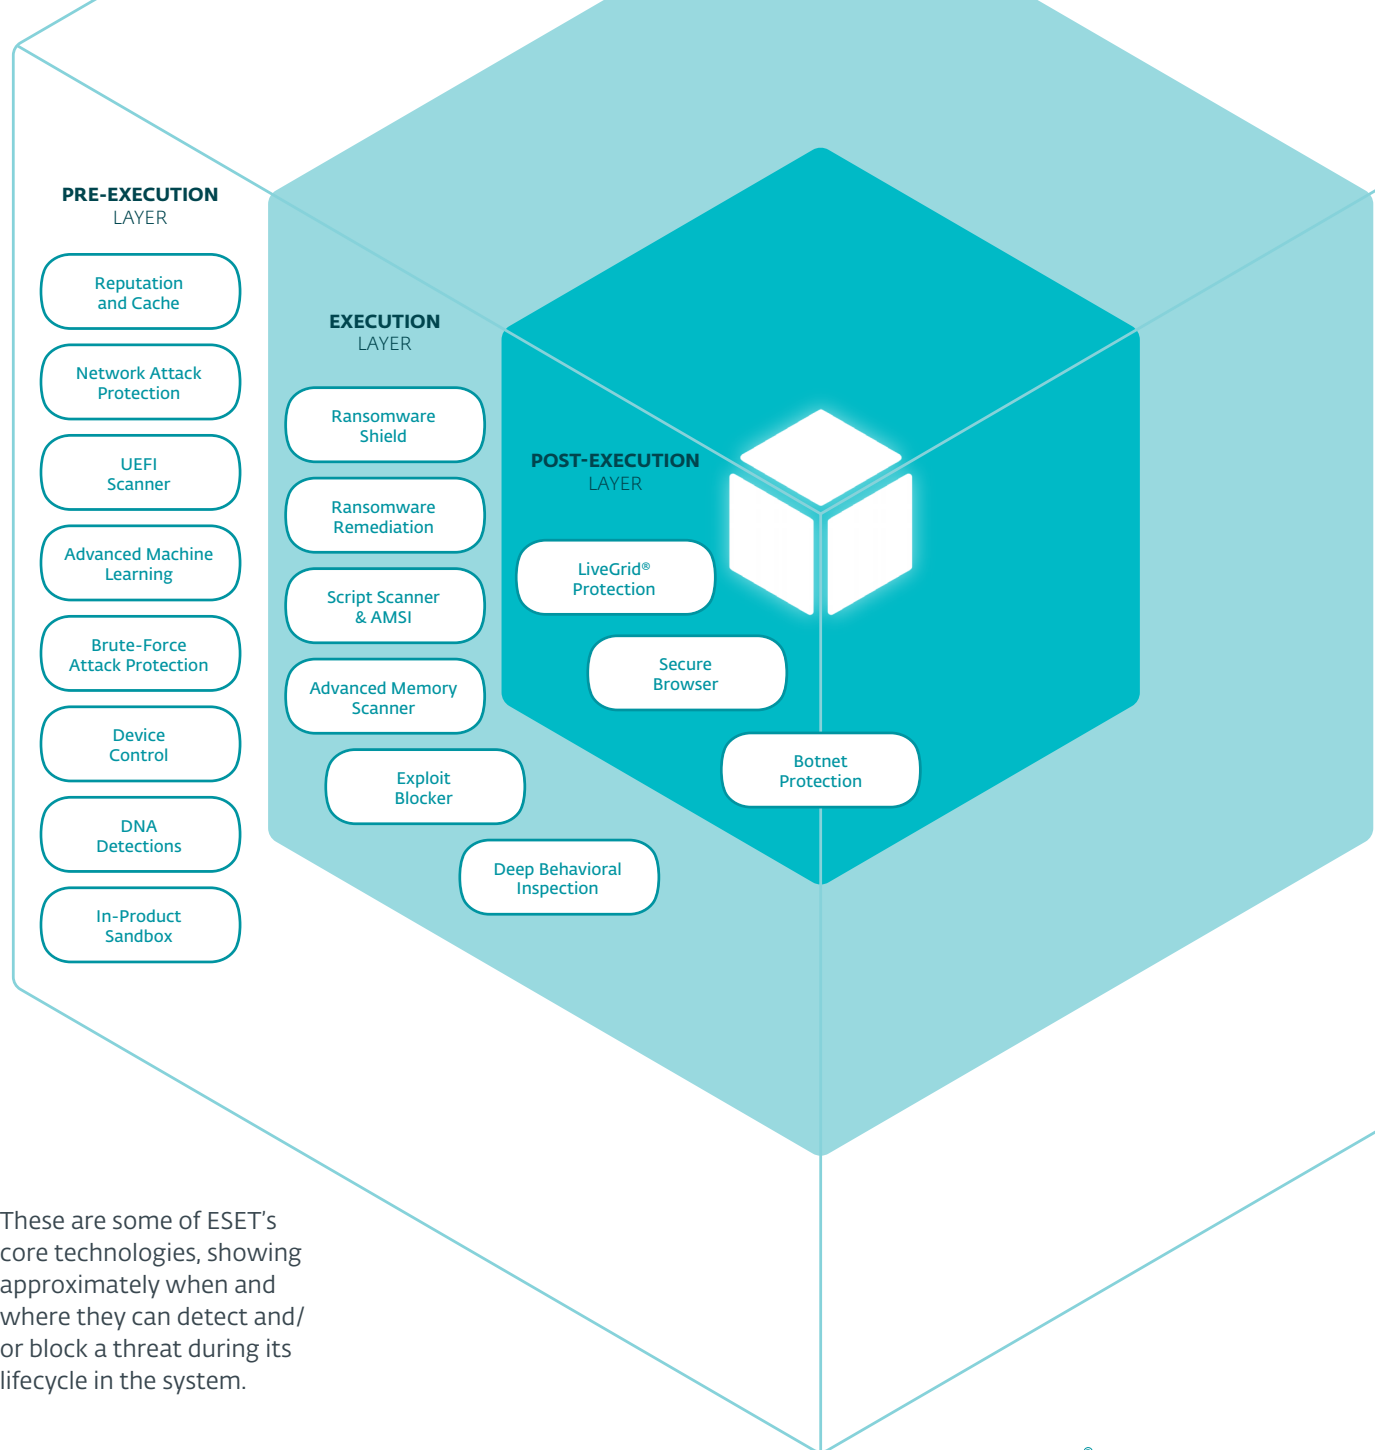

Human Expertise

It's not all about technology. ESET invests heavily in its people to ensure we have an educated and trained workforce that wants to stay with the company. World-class security researchers share their knowledge to ensure the best round-the-clock global threat intelligence.

ESET LiveSense®

Highly effective security

A single layer of defense is not enough in today's constantly-evolving threat landscape. ESET LiveSense® employs a multitude of proprietary, layered technologies that go far beyond the capabilities of basic antivirus.

These are some of ESET's core technologies, showing approximately when and where they can detect and/or block a threat during its lifecycle in the system.
